

I support the removal of the morse code requirement from amateur radio license examinations.

Many will claim that morse code is needed for emergency communications, but that notion is based on that someone on the other end will be able to interpret and understand the signal "encryted" in morse code. On the other hand, most anyone equipped with a SSB reciever would be able to understand a SSB voice communication. ...and we are interested in someone else hearing (and understanding) the emergency communication, right?

Even the US Army has put morse code out to pasture.

Thank you. Brian Litzneberger, n0pmz
